

Dear Provider:

The Louisiana Legislature recently passed Act 503: Changes to Community Psychiatric Support (CPST) and Treatment and Psychosocial Rehabilitation Services (PSR). Please see the attached Louisiana Department of Health Informational Bulletin 22-22 for more information. **ACT 503 will go into effect 01/01/2023 and will affect providers who can perform CPST and PSR Services.**

Due to the upcoming changes to CPST and PSR Service Providers, we are requesting that our Mental Health Rehabilitation Service Providers complete the attached roster form. Please list **all** your agency staff providers (Licensed and Non-Licensed) who service our members. This includes the providers we may currently have listed as par in the UnitedHealthcare Community Plan Network. Please note that failure to list staff will result in the removal of the provider(s) from our system and may affect claims payment. **If you have multiple locations, a roster form must be completed for each location.** There will be upcoming regional training dates to follow, regarding the implementation of ACT of 503.

All Non-licensed Behavioral Health Providers are required, by the Louisiana Department of Health and Hospitals, to complete standard basic training courses. Please update the attached training attestation for all Non-licensed Providers and submit with your roster.

UnitedHealthcare Community Plan appreciates your cooperation with this matter. This information will be used to update our records. This is a one-time request. All future updates are to be done via Provider Express for Licensed Providers and via the Roster Form for Non-licensed Providers.

Please return the updated roster form and attestation to networkse@optum.com.

Thank You,

Network Management
